LINCOLN SCHOOL, TENTH STREET, RICHMOND, CAL.

Richmond School Buildings Compare Favorably With Those of Any of the Coast Cities.
Lincoln School Is One of the Many Attractive Buildings Richmond Has Built For the Accommodation of the Boys and Girls.

Easterners will soon be arriving in Richmond, escorted here by resident friends from the various bay cities, and one of the paramount questions will be: "How about your schools?"

Homeseekers invariably ask the above question first, especially where children are involved.

Richmond is proud of her schools. With the improvements now under way completed, this city will have one of the most attractive chains of school buildings in the state, with comfortable modern housing facilities, playgrounds, gymnasiums, etc.

The large corps of teachers employed in instructing the youths of Richmond cannot be excelled, and the present high standard of the city's schools is in a measure due to the efficient supervision of City Supt. W. T. Helms.

School buildings and improvements approximately estimated at $100,000 will be made during the present year These improvements may be be classified as follows:

Grant School	$52,000
Fairmont	12,000
Peres	10,000
Pullman	10,000

Oiliness

Without "oiliness" any lubricant would be worthless. You can *feel* the oiliness of Zerolene by pouring a little on a piece of glass and rubbing it around with your finger. Oiliness is in reality the molecules of the oil rolling over each other—miniature ball bearings as it were. Thus when you use a *good* oil like Zerolene the wearing surfaces of your engine roll over these "ball bearings" instead of rubbing together. Dealers everywhere.

Printers' Legislation May Help Some

Among the numerous bills introduced at the present session of the legislature regulating and handicapping newspapers, there was one that sounds good to puolishers. It provides for the advertising for supplies by counties (S. B. 1102 by King). This bill would fix the legal square for advertising at 234 ems nonpareil (nine lines), and all space ordered shall be set in nonpareil. If not otherwise stated the regular legal rate shall be $1.00 for the first and 50c for each subsequent insertion."

This bill would settle the periodical agitation in Contra Costa county in regard to the legal size of type, space, price per square, etc. As the bulk of the county printing usually falls in one place, it would make no material difference with the majority of publishers about rates.

An upper county publisher in a half column article on an "equitable apportionment of county printing," said that all pre-election pledges would be fulfilled, and that the various "hungry maws" would be appeased by an even distribution of the county printing.

Dear unsophistocated brother editor, did you say "pre-election pledges?" Forget it!

"Twinkle, Twinkle, Little —— Sayre"

The wise men of the east who horoscope around Boston are known as expert astrologers and fortune-tellers. "Longhairs" tell us that Master Sayre, President Wilson's grandson, was born under a lucky star, and like his grandfather he will become famous. Gee! It must be great to be born under one of those lucky stars.

Jitneys Are Just "Raising Cane"

"These jitney buses are getting entirely too fresh," said a well-known traction company official to a Terminal newspaper representative. It just beats the band how they are buttin' into our field. It looks like they are trying to crowd us off the earth."

The above conversation was the finish to a rumor thaf a jitney service will be put on between First street Macdonald avenue, and Main street, Albany. The plan is to make the fare 10c all the way, or 5c from Pullman.

Y.M.C.A. Occupy Claremont Hotel

The Claremont hotel of Berkeley, built in 1907, is to be opened at last, and by the Y. M. C. A. for the accommodation of the organization's guests during the exposition. The hotel contains 465 rooms which will be modestly furnished, and the building will serve as a haven of rest for Y.M.C.A. boys who have journeyed across the continent to see the big show.

The Claremont is inside the Berkeley line, just far enough to transgress on "dry" territory, which caused the big structure to remain vacant and unfinished seven long years. Frank C. Havens is one of the principal stockholders.

Persistency Essential, Same as 'Safety First'

The spasmodic advertiser becomes quickly discouraged and will tell you that newspaper advertising does not pay. The hardest rock in a stone quarry is not broken by a few mighty and rapid strokes, but yields only after a continuous and steadfast stroke by the patient worker.

The same principal holds good in advertising.

CAPITALIST AND WIFE MURDERED

Jacob Vogel, Aged 75, and Wife Aged 70, Found Dead in Fruitvale Home

Oakland.—Jacob Vogel, aged 75, former president of the Citizens' Bank of Fruitvale, and his aged wife, Elise, aged 70, were found murdered Friday morning, February 12, in their home at 3108 Galindo street, Fruitvale. The house was ransacked.

Both had been tied first, Vogel with his hands behind him and Mrs. Vogel with her hands in front of her by her apron strings.

When their victims were bound, the police believe the thugs tortured the aged man and woman to force them to tell where their wealth was hidden, and when they refused to do so, deliberately killed them.

Their skulls had been crushed by some blunt instrument but the instrument of death was carried away.

A second theory investigated by the police is that the aged couple recognized the thug or thugs while they were ransacking the house and finding themselves detected killed Vogel and his wife to hide their crime.

The bodies were found in the front or sitting room, where the couple had been near the stove reading the evening papers.

Their wealth is believed to have been the motive for the crime. The Vogels were reputed to be worth upwards of $100,000.

According to the police, the crime took place some time between 6:50 o'clock the evening before, when the servant girl, Rosalie Rist, left for San Francisco to attend a dance, and 8 o'clock, when the aged couple had been in the habit of going to bed.

The Rist girl returned at 2 a. m. She entered through the back door, which had been left open for her.

She found the kitchen badly upset, and walked into the dining room. That room, too, showed signs of having been turned upside down.

All the doors were standing open, but the girl did not see the bodies lying in the next room.

Frightened, she went into her own room upstairs, where $1 had been taken from her purse.

The girl then went downstairs again to seek the old couple and, seeing their own bedroom upset, with the floor littered with the contents of the bureau drawers, she became so frightened that she ran to the home of P. E. Grosse at 3084 Galindo street, where she told what she had seen.

The Grosse family thought, as did the girl, that perhaps Vogel and his wife had had a quarrel, and so did not wish to interfere.

The girl was kept there overnight, but when in the morning the neighbors saw the curtains of the Vogel home all drawn, an unusual sight, they became alarmed and investigated.

The two old folks were lying on the floor, their heads crushed.

WOMAN LOSES REASON FROM BEING MAROONED

Cut Off by Storm She Suffers From Hunger and Exposure

Redwood City.—After being marooned in the mountains for ten days by the storm, Mrs. Amelia Androtte and Louis Hunzeker were rescued and brought to Redwood February 10. Mrs. Androtte, who conducts a small dairy farm in the La Honda district, is violently insane as a result of the experience, and Hunzeker, a nineteen-year-old farm hand who worked on her place, is seriously ill from hunger and exposure.

The Androtte place is several miles back in the mountains. The food supply was running low, and Hunzeker was preparing to go to Redwood for provisions when the storm began. The trail to La Honda soon became impassable. After being stormbound for two days Hunzeker ventured out, but was driven back. While he was away Mrs. Androtte's mind became deranged from fear and worry. She became so sick that Hunzeker did not dare to leave her, and the two were forced to live ten days on some rice, a can of peaches and a pet goat which was slain for meat.

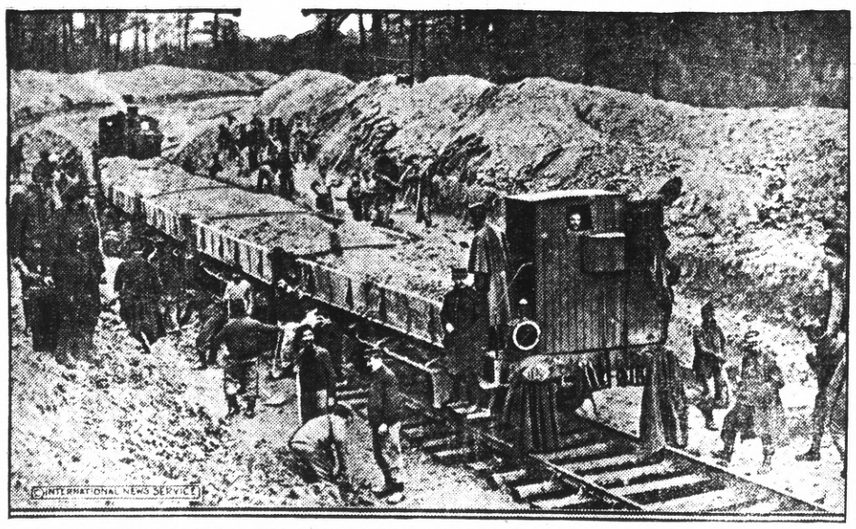

Hunzeker finally managed to get word to the Weeks ranch, seven miles away. A rescue party was made up, and the two were brought to Redwood City. They are being cared for at the county jail by Dr. J. L. Ross, and will be removed to a hospital when Mrs. Androtte's condition improves sufficiently.

UNCLE SAM MAY OWN CANAL TRADE FLEET

Washington.—Plans for the establishment of an augmented naval auxiliary fleet and the operation of these ships in intercoastal traffic under the direction of the government owned Panama canal railroad, are contained in a bill introduced by Representative Stevens of California.

The bill authorizes the sale of $30,000,000 worth of Panama canal bonds to enable the government to construct a fleet of vessels in the shipyards of the Atlantic and Pacific coasts.

FRENCH SAPPERS BUILDING NEW RAILWAY

In three weeks the French engineering corps completed a one-track railway line running from Versailles to Compiegne so that troops can be transported to the front without passing through Paris. The road runs through the woods of Empress Josephine's Malmaison estate.

GERMANS ABANDON CITY WON FROM FOE

Fierce Battle for Passes of the Carpathians Rages Without Pause

Paris.—The evacuation of Lodz by the Germans has been confirmed, according to a Petrograd dispatch to the Havas News Agency of February 11, which states that stores, offices, commissariat and transports are being removed hastily to Kalisz.

A refugee who escaped to Czenstochowa, the dispatch credits with the statement that the Germans have resumed with redoubled vigor the construction of heavily fortified lines which was suspended six weeks ago.

London.—The daily Mail's Petrograd correspondent reports that the Russian forces have reached a point 20 miles south of Dukla pass in the Carpathian Mountains.

The correspondent adds that each Austrian column that attacked independently in the recent heavy fighting was shattered as it came on, and that the powerful German reinforcements which were aiding the Austrians now are apparently being withdrawn and removed to the East Prussian front, where the Germans are beginning a new offensive toward Mlawa.

"The Russians are retreating from Bukowina, strongly pressed by superior Austro-German forces," says the Daily Chronicle's Czernowitz correspondent. "They are stubbornly contesting every yard and falling back in good order. It may be expected that they will attempt to make a stand here at Czernowitz and hold the capital of the province."

Geneva.—The battle which began in the Carpathians on February 7 still is raging furiously along a front of sixty miles, from Mount Polonina Runa to Mount Mako, according to the latest information received here. In the Mezelaborez region, General Dankl is said to have been obliged to send reinforcements to extricate a Hungarian corps which was almost cut off.

The Russians are reported to have gained several miles in the valley of Lyutts, which borders the northern slopes of the Polonina-Runa, and also advanced a half mile in the valley of Laborez, where the railroad passes. In a single charge by the Russians upon Austro-Hungarian trenches 1800 men are said to have been killed and wounded in three hours of bayonet fighting.

CALIFORNIA RAISIN MEN GET GLOWING REPORTS

Expenses and Good Dividends Paid from 1912 Profits

Fresno.—Glowing reports were made February 10 at the annual meeting of the California Associated Raisin Company, and the following directors were re-elected for the coming year: Wylie M. Giffen, James Madison, Hector Burness, H. H. Welch, A. G. Robinson, A. G. Wishon and H. Graff.

Manager Madison, in his annual report, announced that sufficient profits had been received from the 1912 crop of raisins to pay all expenses and 9 per cent on the capital stock issued.

Madison also reported that the Associated had purchased the Fresno Home Packing Company, one-fifth interest in the Pacific Coast Seeding Company, erected five new warehouses and had sold 67,000 tons of raisins and shipped 62,000. There is left on hand 35,000 tons, which is 500 tons less than the crop on hand at the same date last year.

Quake's Death Toll 25,000

Rome.—The Giornale d'Italia February 11 publishes semi-official statistics of the fatalities in the recent earthquake, showing that 25,000 persons perished. Avezzano had the heaviest loss of any town, 10,719 of its inhabitants, or 96 per cent of the population, having been killed.

BURNS CAPTURES 'SCHMITTY' IN N.Y.

Prisoner Will Be Extradited to California on Indictment for Carrying Explosives

New York.—Matthew A. Schmidt, known familiarly as "Schmitty," was arrested here February 13 as a fugitive from justice on an indictment found in Los Angeles in October, 1910, charging him with having been implicated in the dynamiting of the Los Angeles Times building.

Schmidt, who disappeared shortly after the Times building was wrecked, was taken into custody at Broadway and Sixty-fourth street by police officers working in conjunction with Detective William J. Burns, who had been trailing him for four years.

According to Detective Burns, Schmidt was one of the men who went with J. B. McNamara to the works of the Giant Powder Company near Richmond, Cal., and procured nearly 1,000 pounds of dynamite. This was taken to San Francisco and later transported to Los Angeles on the launch Peerless.

Witnesses were found who testified they saw Schmidt on the launch with David Caplan and another man after they had paid the visit to the powder works. It was also learned that he was an intimate of Anton Johansen, organizer of the Millmen's Union, and Jack Lofthouse, a cabinet worker, who lived at the home of Mrs. Belle Lavin, 2410 Mission street, San Francisco. Both Johansen and Lofthouse were closely indentified with men in the confidence of the McNamara brothers.

Detective Burns said the arrest of Schmidt was the outgrowth of an investigation into a bomb explosion which occurred in a six-story flat building in Lexington avenue, this city, July 4 last, and resulted in the death of three persons and the injury of others.

EDITOR SWIFT IS WINNER OF REDWOOD POSTOFFICE

Redwood City.—J. V. Swift has received word from Washington that he has been nominated for the postmastership of this city.

Swift is a widely known newspaper man, and through his own paper, the Redwood City Democrat, has long taken an active part in the political battles of the Democracy. In the recent State campaign he vigorously supported Senator-elect James D. Phelan. Swift met with opposition in his candidacy for postmaster, but strong indorsements from business men and educators, in addition to his political backing, turned the scale in his behalf.

GERMANY WILL ENFORCE DECREE

American Note Does Not Vex Berlin, Which Admits Certain Points

Berlin—German Foreign Office, after studying the American note respecting the declaration by Germany of a war zone in the waters around Great Britain and Ireland, states that the terms are much friendlier than previously had been expected by reason of the incomplete newspaper dispatches published here.

The Foreign Office had not anticipated that the United States would accept the German position without objection, and it even recognized that from the American standpoint certain of the points raised are quite justified.

Germany, however, it is declared, intends to adhere to its own viewpoint. Various officials, diplomatic, naval and military, whose opinions have been sought profess to see no elements of danger in the situation and are convinced that the naval campaign can be conducted on the lines laid down in the Admiralty proclamation without involving difficulties between the United States and Germany.

MOUNTAIN TRADE MAY GO TO SACRAMENTO

Lively Race With Stockton for Lateral With State Highway

Stockton.—Sacramento and Stockton are running a neck-to-neck race for the lateral which will connect mountain towns with the main State highway. The former city favors the proposed route running from Jackson, Amador county, to the Capital City, with zig-zag branches to towns near the route. This would give Sacramento merchants the mountain trade which, since the days of 1849, has been enjoyed largely by this city.

Local promotion bodies, including the Chamber of Commerce of Northern San Joaquin, are urging a lateral from the main highway near Lodi to Wallace, with branch roads from that point on to San Andreas and Jackson.

This, it is stated, will be the more economical route and will also accommodate the heavy travel from San Francisco and southern points.

Nevada City.—The funeral of former Congressman W. F. Englebright took place from the Episcopal Church here February 12 and was attended by a large concourse. Masonic fraternities, in which he was prominent, conducted the ceremonies. Business was quite generally suspended during the services.

ST. PETER'S SQUARE IN ROME

St. Peter's square in Rome was hard hit by the earthquake. The obelisk seen in the foreground in the photograph, was shaken and badly damaged; the famous colonnade, seen at the right, was lowered four feet, and the adjacent house, once occupied by the sisters of Pope Pius X, was seriously cracked.

HARD TO UNDERSTAND WOMAN

You May Call Her a Duck, She Smiles at Term of Chicken, But Will Not Stand for Hen.

The fat plumber was in a philosophical mood.

"There is simply no understanding woman," he observed.

"Whaddye mean, understand?" the thin carpenter asked, just to start the conversation.

"Well, for instance, a woman doesn't object to being called a duck."

"No."

"And she even smiles if someone happens to refer to her as a chicken."

"Too true."

"And most of them will stand for being called squab, broiler or turtle doves."

"Yes, yes, but what's the idea?"

"It's just this," the fat plumber exclaimed, "a woman objects to being called a hen, and a hen is the most useful bird of the whole blooming bunch."—Youngstown Telegram.

Heart in Her Work.

"I'm glad to hear that your daughter is taking more interest in her music," said Mrs. Grammercy. "I remember you used to say you couldn't get her to practice. You must be pleased that she now realizes the importance of it and is taking longer lessons. How do you account for the change?"

"I'm afraid," replied Mrs. Park, "that she has fallen in love with her music teacher."—Judge.

The Unknown Quantity.

First Native—We're doin' fine at the war, Jarge.

Second Native—Yes, Jahn; and so be they Frenchies.

First Native—Ay; an' so be they Belgians and Rooshians.

Second Native—Ay; and so be they Allys. Ol dunno wher they come from, Jahn, but they be devils for fightin'—London Punch.

An Art Impression.

"I have no doubt," said the admiring constituent, "that posterity will set up a statue of you in bronze or marble."

"Well," replied Senator Sorghum, "if it's all the same, I'd rather they'd make it bronze. It isn't so likely to make a great man look as if he had been caught in a snowstorm with a suit of cotton clothes on."

A Subtle Maid.

Little Minkley had talked for an hour on the subject of evolution.

"And now, my dear Miss Blisterton, do you believe in the missing link?" he said in conclusion.

"Yes, I do now," replied the fair maiden, "though I didn't until I saw you."—Judge.

Open to Suspicion.

"What is your idea of a pedant, anyhow?"

"Well, it is sometimes rather difficult to say who is a pedant and who is not, but I think you would be reasonably safe in suspecting a person of pedantry who speaks of hair and whiskers as 'hirsute adornment.'"

His Effect.

"Doctor Jibs seems to be looked down on by the rest of the profession."

"That's on account of his unprofessional conduct."

"In what way?"

"Why, the man will use any treatment at all which will cure the patient."

Point in Its Favor.

"I don't deny that scribbling verses in one's spare time is a bad habit."

"How could you think otherwise?"

"But you will notice that the man who spends his evenings wooing the muse never wakes up next morning with a headache and a tongue that feels like a bath sponge."

BEHIND THE SCENES.

De Critic—Travel broadens the mind.

De Hamlet—Yes; but it is sometimes tough on the feet, isn't it?

Economics.

"Father," said little Willie Watkins, after a careful perusal of the morning paper, "what is water for in stocks?"

"It is used to float the company on when times are prosperous, my son," said Mr. Watkins, "and to help it liquidate when times are bad."—Judge.

Pleased.

"Your wife's tastes are literary, and not musical," said the inquiring relatives.

"Yes. And that's lucky. I'd rather she'd sit up till midnight reading a book than sing songs or play the piano."

Flattering Comparison.

"I understand that your political friends call you a Jonah."

"No such luck," replied the statesman. "I got swallowed up in defeat for keeps. When Jonah got swallowed he managed to come back."

A Family Jar.

"I suppose you know I came near marrying Jim Wombat before I married you."

"Yes, I know it," said the goaded husband. "He rubs it into me every time he gets a chance."

WOMAN WOULD NOT GIVE UP

Though Sick and Suffering; At Last Found Help in Lydia E. Pinkham's Vegetable Compound.

Richmond, Pa. — "When I started taking Lydia E. Pinkham's Vegetable Compound I was in a dreadfully rundown state of health, had internal troubles, and was so extremely nervous and prostrated that if I had given in to my feelings I would have been in bed. As it was I had hardly strength at times to be on my feet and what I did do was by a great effort. I could not sleep at night and of course felt very bad in the morning, and had a steady headache.

"After taking the second bottle I noticed that the headache was not so bad, I rested better, and my nerves were stronger. I continued its use until it made a new woman of me, and now I can hardly realize that I am able to do so much as I do. Whenever I know any woman in need of a good medicine I highly praise Lydia E. Pinkham's Vegetable Compound." — Mrs. FRANK CLARK, 3146 N. Tulip St., Richmond, Pa.

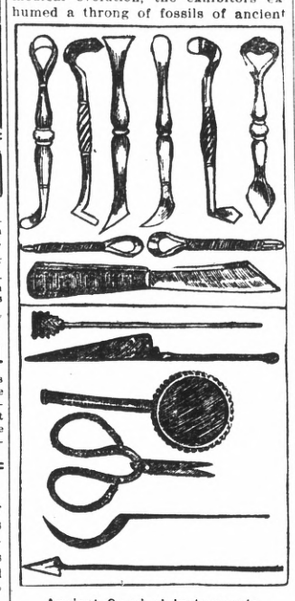

Women Have Been Telling Women for forty years how Lydia E. Pinkham's Vegetable Compound has restored their health when suffering with female ills. This accounts for the enormous demand for it from coast to coast. If you are troubled with any ailment peculiar to women why don't you try Lydia E. Pinkham's Vegetable Compound? It will pay you to do so. Lydia E. Pinkham Medicine Co., Lynn, Mass.

Exhibition of Crude Old Surgical Instruments.

Modern Scientists Amused at Fossils of Ancient Learning and Superstition—Some Rare Medical Volumes Also Shown.

Like a museum of geology of the medical profession was the exhibit of rare old tomes and crude surgical instruments which was held by the Missouri Historical society, assisted by the St. Louis Medical society. Digging down into forgotten strata of medical evolution, the exhibitors exhumed a throng of fossils of ancient

Ancient Surgical Instruments.

learning and superstition as quaint to the eye of modern science, with its germ theory of disease, aseptic surgery and X-ray, as is a flint arrowhead to the crew of a 42-centimeter howitzer.

The exhibits came from the libraries of the medical schools of St. Louis and Washington universities; from the library of the surgeon general of the United States army in Washington, and from the private collections of physicians in St. Louis and other cities.

Dr. George Dock, dean of the medical faculty of Washington university, supplied a facsimile of the diploma conferring a doctor's degree upon William Harvey, who discovered the circulation of the blood. Dr. James Moores Ball of St. Louis, among scores of other old volumes, loaned "Surgical Works" of Ambrose Pare, the Frenchman who haunted the wars of his time (1509-1590) and became the father of military surgery.

A copy of "the first work on pathology," published at Venice in 1761 by Johannes Baptista Morgagni and entitled "Concerning the Seats and Causes of Disease," was loaned by Dr. Robert E. Schlueter of St. Louis. Among the hundreds of other "quaint and curious volumes of forgotton lore" which were on display were a "Regimen Sanitatis," published in Venice in 1495, three years after the discovery of America, and loaned by Dr. E. C. Streeter of Boston; the "Labyrinth of Medical Errors," published in 1553 by the renowned Theophrastus Paracelsus; the complete "Thesaurus Botanico-Medico-Anatomicus" of Marcellus Maepighius, published in 1687, and Thomas Guidott's "On ye Bathe," a treatise concerning the medical qualities of the waters at that resort, which was issued in 1676.

The War's Historian.

"When the history of this war comes to be written" is a constantly recurring journalistic phrase, as if the story of this great conflict could ever be written. You may be fairly certain that no one under the rank of an archangel, in close touch with omniscience, will ever write the full history of the world war. Down below there isn't the knowledge, and there isn't the time. There will be some sectional accounts. But if in the fullness of time a world syndicate succeeds in getting some million tons of print within covers, the public will (one hopes) be thinking of something else.—London Chronicle.

Escorts for Hire in Kansas City.

The young man of engaging manners who is willing to hire himself out as an escort to women is said to have a field for his activities these days. Even in Kansas City the new profession has made its appearance, but it is said to have originated in New York. Parents who wish to send their daughters to a concert have only to telephone the beaux's bureau, indicate the mental complexion they expect of the young man and say whether or not they want him to wear evening dress. The bureau fills the order, the girl hears the concert and the young man is well paid for his trouble.

Value of Ashes.

A ton of average hardwood ashes contains 100 pounds of potash, 32 pounds of phosphoric acid, and 640 pounds of lime, or about one-third of the latter. Tree trimmings run 100 50 and 375 pounds, respectively. Weeds will doubtless average about the yield for hay and straw or 20, 2(and 100. Coal ashes are practically valueless as fertilizer, but improve the physical condition of close or sticky soils. Average stable manure contains about one-tenth as much potash as do hardwood ashes.

A Disguise.

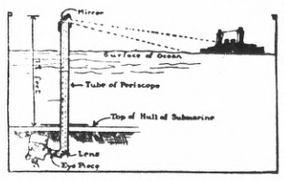

"What are you going to wear at the fancy dress ball, Mabel?"

"I'm going to wear two skirts and a petticoat and go as an old-fashioned matron."

AID FOR MODERN SUBMARINE

Periscope Enables Operator to Observe What Is Passing on Surface of Water Above Him.

The modern submarine is effective only because those within the vessel are able to look over the surface of the sea in all directions, even though the submarine is beneath the surface of the water. The periscope makes this possible and so it deserves to be called the eye of the submarine. The periscope is a straight, hollow tube that rises from the steering compartment of the vessel and reaches above

The Submarine's Eye.

the water when the submarine is lying just beneath the surface. As the periscope is but six inches in diameter and rises but 18 inches above the water, it is almost invisible. The rays of light enter the opening in the side of the tube at the top and are reflected downward to a lens at the bottom, which focuses them and gathers the rays into an eye-piece through which the operator is enabled to see what is passing on the surface above him. The total length of the periscope on the ordinary submarine is about 15 feet.—American Boy.

NOT HARD TO CATCH RABBIT

Trap Shown in Illustration Will Accommodate at Least a Dozen Animals—Is Always Set.

My rabbit trap is always set, sets itself automatically and can catch from one to a dozen rabbits before they need to be taken out, writes H. L. Winston of Kittitas county, Wash., in Missouri Valley Farmer. The trap should be four or five feet long, four inches wide and six inches high. One end B, is closed with woven wire.

Rabbit Trap Always Set.

The trap door is in the bottom of the trap over a pit, barrel or box. A door is put in the top over the trap door. Fasten a weight to the short end of the trap door, just heavy enough to bring the door back up level after the rabbit has fallen into the pit.

DON'T ITCH! USE RESINOL

Just put on a little of that soothing, antiseptic resinol ointment and the itching and burning stop at once. Soon all trace of eczema, ringworm, rash, or other tormenting skin trouble is gone. Every druggist sells resinol ointment and resinol soap. Prescribed by doctors for 20 years.—Adv.

HOW TO SUCCEED

During the last few years, conditions in all lines of business, even professional life, have changed so completely that every man is waking up to the fact that in order to win success he must specialize and learn to do some one thing and do it well.

So it is with any article that is sold to the people. It must have genuine merit or no amount of advertising will maintain the demand for the article.

For many years druggists have watched with much interest the remarkable record maintained by Dr. Kilmer's Swamp-Root, the great Kidney, Liver and Bladder Remedy. From the very beginning the proprietors had so much confidence in it that they invited every one to test it.

It is a physician's prescription.

They have on file thousands of unsolicited letters received from former sufferers who claim they are now enjoying good health as a result of its use.

However, if you wish first to try a sample bottle, address Dr. Kilmer & Co., Binghamton, N. Y., enclose ten cents and mention this paper. They will promptly forward you a sample bottle by Parcel Post.

Regular sizes for sale at all druggists—fifty-cents and one-dollar.

SOAP BUBBLES ARE AMUSING

Plenty of Fun for the Little Folks as Well as Old Ones—Many Games May Be Played.

Bubbles make lots of fun, not only for the very little boys and girls, but for the more grownup ones, too, as really good games can be played with them. But provide plenty of pipes, one for each, the white clay kind, you know. Then make some soap jelly by boiling white soap in water and letting it cool. This may be kept in a jar ready for use. A couple of teaspoonfuls of the jelly in a cup or bowl of warm water will furnish countless bubbles.

Many games may be played with the bubbles. An ironing board leaning against a heavy table or the window seat and firmly braced makes a well padded path to roll the bubbles down. A large, light hoop suspended well above people's heads, is all that is needed for a fine game. Sides are chosen, which take up their places on opposite sides of the hoop, and at equal distances from it. Each player has a pipe and each side a bowl of soapsuds. The sides play alternately. At each turn a player steps up to a given line, blows a bubble, tosses it high in the air, and then tries by blowing it gently to get it through the hoop. If he fails he must go to the other side. The game is finished when all the players are on one side. A string stretched across the room about six feet from the floor makes a good substitute for the hoop.

GIVE "SYRUP OF FIGS" TO CONSTIPATED CHILD

Delicious "Fruit Laxative" Can't Harm Tender Little Stomach, Liver and Bowels.

Look at the tongue, mother! If coated, your little one's stomach, liver and bowels need cleansing at once. When peevish, cross, listless, doesn't sleep, eat or act naturally, or is feverish, stomach sour, breath bad, has sore throat, diarrhoea, full of cold, give a teaspoonful of "California Syrup of Figs," and in a few hours all the foul, constipated waste, undigested food and sour bile gently moves out of its little bowels without griping, and you have a well, playful child again. Ask your druggist for a 50-cent bottle of "California Syrup of Figs," which contains full directions for babies, children of all ages and for grown-ups.

COVER FOR TROOPS

Moving Shields Advocated in Warfare.

Idea Has Been Seriously Put Forth and Is Being Considered by Powers at War—Its Method of Operation.

As for a French officer's suggestion of moving shields, an American has already invented one and has written about it to the heads of the belligerent governments. He offers to demonstrate the efficiency of his device.

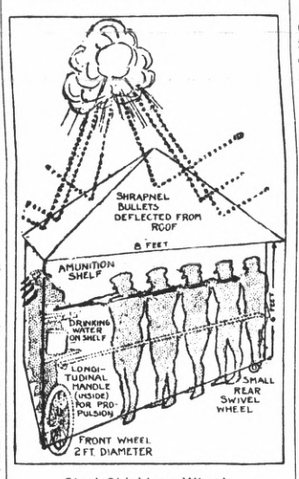

The "bullet deflector," as he calls it, is made of two sheets of steel six feet wide, eight to ten feet high and one-quarter-inch thick. The sheets are jointed at an acute angle, so as to make a triangular shield, the base of which is open. The device, which weighs 1,200 pounds, is mounted on wheels and can be trundled along by the ten men it can shelter. At a suitable height are holes through which rifles can be aimed. It has compartments for water and food, and a top to protect its occupants from sun and rain and shrapnel.

It can be used, he thinks, to great advantage in infantry advances when the supporting artillery has cleared the way, as the attackers would be safe from rifle fire until they go close enough to charge with the bayonet if they desired. He says that a bullet striking one of the faces of the barbette would glance off harmlessly, and that it would be impervious to machine-gun fire.

For defense he thinks a cavalry charge or a bayonet charge would beat itself to pieces against a wall of steel. Folding shelves could be put into it, and they would make bunks for the crew. On the march it could be drawn by cavalry horses. Its cost would be relatively small.

"I would consider one soldier equipped with the deflector," he says, "of more service to his country and his cause than 50 not so protected, for the simple reason that he can operate all the time during a long campaign in a hundred battles while the 50 are dead in the trenches. I am aware that many objections will be made to its use in battle, all of which I can easily answer. Its advantage over the stationary defenses, such as sandbags and barricades, would be many.

"In the first place, the men would not have to lie down on the ground or remain in a cramped, stooped position for many hours. They can shoot without exposing their heads to the

Steel Shield on Wheels.

enemy. A bullet striking the barrier will not throw dust into their eyes to blind them. They will not be exhausted by the laborious process of 'digging' in."

Heavy Wood Best Fuel.

Equal weights of dry, nonresinous wood are said to have practically the same heat regardless of species, and as a consequence it can be stated as a general proposition that the heavier the wood the more heat to the cord. Weight for weight, however, there is very little difference between various species; the average heat for all that have been calculated is 4,600 calories, or heat units, per kilogram. A kilogram of resin will develop 9,400 heat units, or about twice the average for wood. As a consequence, resinous woods have a greater heat value per pound than nonresinous woods, and this increased value varies, of course, with the resin content.

Had Eight Sets of Twins.

Squire Robert I. Mitchell, who visited his old home near Ridgeville recently, brought back a bit of rare news. The wife of West Graves, a negro of that section, has just presented her husband with the eighth consecutive set of twins. The young couple have been married about thirteen years, the knot having been tied by Squire Mitchell when he was a justice of the peace. A remarkable circumstance thereof is the fact that in each set of twins was a boy and a girl. There are eight children living, one of each set having died.—Caswell (N. C.) Dispatch to New York Tribune.

Cossack Loyalty.

The Cossack at home is good-tempered, fond of his children, devoted to his horse, his intimate knowledge of that animal seeming to make him the best horseman in Europe. The novelist Gogol speaks of him in high terms for his faithfulness to a comrade-in-arms: "The Cossack's first duty and first glory," says Gogol, "is to fulfill the duty of comradeship. Long as I have lived in the world, gentlemen brothers, I never happened to hear that a Cossack ever left his comrade or betrayed him in any emergency."

Going Them One Better.

Mrs. Newrich—She has "Wednesdays" on her card.

Newrich—Well, we'll put "paydays" on ours.

Banish the "Blues!"

If you have that depressed feeling it's more than likely that your blood is out of order—impoverished or poisoned.

There is only one thing that will alter your present condition—that's to restore your stomach to normal health and strength. For a weak or diseased stomach cannot make good blood. If your digestion is bad your food will not make the good blood which nourishes body, brain, heart and nerve.

Dr. Pierce's Golden Medical Discovery

helps the stomach to do its work naturally and properly. Stimulates the liver. The system is freed from poison. The blood is purified. Every organ is rejuvenated. Instead of the "Blues," you feel fit and strong, equal to any task or up to any pleasure.

This great remedy has proved its worth year after year for over *forty* years. Let it prove its worth to you. Sold by medicine dealers in tablet or liquid form or send 50c for trial box by mail.

Send 31 one-cent stamps to pay cost of mailing only on a free copy of Dr. Pierce's Common Sense Medical Adviser, 1008 pages, clothbound. Address Dr. V. M. Pierce, Buffalo.

Shipping Fever

Influenza, Pinkeye, Epizootic, Distemper and all nose and throat diseases cured, and all others, no matter how "exposed," kept from having any of these diseases with SPOHN'S LIQUID DISTEMPER CURE. Three to six doses often cure a case. One 50-cent bottle guaranteed to do so. Best thing for brood mares; acts on the blood. 50 cents a bottle, $5 dozen bottles. Stuffed Celery.

Thoroughly clean perfect stalks of celery and cover with ice until crisp. Mix to a cream one-quarter pound of roquefort cheese, one-half pound of cream cheese, one tablespoonful of butter, one teaspoonful of Worcestershire dressing, one-eighth teaspoonful of paprika and one teaspoonful of finely chopped olives. Stuff celery with this mixture and serve ice cold on lettuce leaves. After the celery is stuffed cut it into two-inch lengths.

A TREATMENT THAT HEALS ITCHING, BURNING SKINS

Don't stand that itching skin humor one day longer. Go to the nearest druggist and get a jar of resinol ointment (50c) and a cake of resinol soap (25c). Bathe the eczema patches with resinol soap and hot water, dry and apply a little resinol ointment.

It's almost too good to be true. The torturing, itching and burning stop instantly, you no longer have to dig and scratch, sleep becomes possible, and healing begins. Soon the ugly, torturing eruptions disappear completely and for good.—Adv.

PLAN FOR EDUCATING GIRLS

Scheme of Chicago Board of Education Means Much to Mothers and Young Women Themselves.

The following proposed plan of the Chicago board of education of training girls in the public schools will be of interest to mothers. It will also mean much to the girls themselves when they land in a home of their own, as most girls eventually do:

How to arrange and care for a kitchen.

How to select, use and care for kitchen utensils.

What kind of fuel to use in cooking.

What kind of foods to cook and how to cook them.

The effect of the different foods on digestion.

What foods are fat producing and what foods are heat producing.

How to buy foods with the greatest possible economy.

How to write bills of fare that shall be attractive as well as furnish the right proportion of different foods.

How to keep their homes sanitary.

How to care for the plumbing.

How to darn socks.

How to patch trousers.

How to make their own dresses.

Look Ahead!

The present moment is the worst; the lenient hand of Time is daily and hourly either lightening the burden, or making us insensible to the weight.—Robert Burns.

Weeks' Break-Up-a-Cold Tablets

A guaranteed remedy for Colds and La Grippe. Price 25c of your druggist. It's good. Take nothing else.—Adv.

Most Assuredly.

Church—This paper says that Toledo employs a woman food inspector on its board of health staff.

Gotham—Well, they've got to have somebody to pass on the quality of fudge handed out, haven't they?

White Fruit Cake.

To make an especially delicious cake of the lasting variety cream together one cupful of butter and two cupfuls of sugar and add one cupful of milk. Sift three cupfuls of flour and one teaspoonful of baking powder three times and add to the mixture and stir well. Slice very thin one pound of citron, blanch one pound of almonds and chop fine and grate one medium-sized fresh cocoanut and add to the mixture with one wineglassful of white wine, stirring enough to mix only. Last fold in the beaten whites of eight eggs. Bake in two loaves and cook in a moderate oven.

Apple Slump.

Pare and slice your apples, sweeten to taste, add cinnamon and a little salt. Prepare a crust as follows: Two cupfuls flour, two level teaspoonfuls baking powder, one teaspoonful salt, sifted together. Mix thoroughly with this two tablespoonfuls shortening, wet with milk or water until a soft dough. Place over apples. Make three or four cuts in top, to allow steam to escape, and bake. Serve with molasses sauce or with sugar and cream.

Purifies Blood With Telling Effect

Gives Conscious Evidence of Its Direct Action.

S. S. S., the famous blood purifier, almost talks as it sweeps its way through the circulation. Its action is so direct that very often in some forms of skin affliction the appearance of the eruptions changes over night, the itch and redness are gone and recovery begins immediately.

As a matter of fact, there is one ingredient in S. S. S. which serves the active purpose of stimulating each cellular part of the body to the healthy and judicious selection of its own essential nutriment. That is why it regenerates the blood supply; why it has such a tremendous influence in overcoming eczema, rash, pimples, and all skin afflictions.

And in regenerating the tissues S. S. S. has a rapid and positive antidotal effect upon all those irritating influences that cause rheumatism, sore throat, weak eyes, loss of weight, thin, pale cheeks, and that weariness of muscle and nerve that is generally experienced as spring fever. Get a bottle of S. S. S. at any drug store, and in a few days you will not only feel bright and energetic, but you will be the picture of new life. S. S. S. is prepared only in the laboratory of The Swift Specific Co., 534 Swift Bldg., Atlanta, Ga., who maintain a very efficient Medical Department, where all who have any blood disorder of a stubborn nature may write freely for advice and a special book of instruction. S. S. S. is sold everywhere by drug stores, department and general stores, but beware of all substitutes. Do not accept them.

A Draft—You Catch Cold—Then Follows

Coughs, Cold Stiff Neck Neuralgia

Especially in the piercing pain of neuralgia or the dull throb of headache is Sloan's Liniment wonderfully relieving. Laid lightly on the part where the pain is felt, it gives at once a feeling of comfort and ease that is most welcome to the overwrought sufferer.

Hear What Others Say:

"There are no Liniments that equal Sloan's. My husband has neuralgia very often, he rubs Sloan's on his face and that is the last of it."—*Mrs. V. J. Brown, Route 1, Box 191, Halls, Tenn.*

"I have used Sloan's Liniment for family use for years and would not be without it. We have raised a family of ten children and have used it for croup and all lung trouble; also, as an antiseptic for wounds, of which children have a great many, it can't be beat. My wife sprained her ankle last summer and it was in bad shape. Sloan's Liniment applied enabled her to be as good as ever in a week. I have used it several times for sprains and rheumatism."—*John Newcomb, R. E. No. 2, Keokuk, Iowa.*

SLOAN'S LINIMENT

It works like magic, relieving Lumbago, Rheumatism, Sprains and Bruises. No rubbing—just lay it on. Price 25c. All dealers. Send four cents in stamps for TRIAL BOTTLE. Sent to any address in the U. S.

"For the cause that lacks assistance,
Against the wrong that needs resistance,
For the future in the distance,
And the good that we can do."

Be neutral—don't knock—safety first.

The Big 1915 Show opens tomorrow.

A slogan that has been overlooked: "Pay it now. We need the money."

It is better to go to church Sunday and work Monday. Try it yourself.—Bill Sunday.

Another recipe for making times good is to wear out your old clothes and "hike" that subway nickel.

And everybody in Richmond is boosting for the success of the world's greatest exposition.

The girls are now wearing shoes laced on the inside. Frequently, they (the shoes) are laced on the street.

To be compelled to pay "deadhoss" polltax at this late hour is enough to drive a man to the trenches.

It now develops why Francis J. Heney did not prosecute the alleged Oakland graft cases. Dan Cupid "stopped the deal."

A noted philanthropist millionaire advises: "Prosperity is coming, but we must reach for it." Those with elastic arms get busy.

If a movie show advertised a free performance, it would be difficult to control the crowds. When a church advertises a free performance it is different.

A good slogan for all union men: "The employer has to get the money before the employe can get it, so give him a chance; for if the employer is not prosperous, the employe surely cannot be.

You have been warned in regard to your income tax. If your returns for 1914 are not in by March 1, you are taking a chance of paying a severe penalty. Revenue officers will comb each district.

And now eye-glasses and spectacles (on account of the war, of course) have advanced 50 per cent. As 10,000,000 persons in the United States wear glasses, the increase in price may cause strabismus of the pocketbook.

Assemblyman George Gelder of Berkeley is opposed to the proposed state tax on saloons. Mr. Gelder says this measure, should it become a law, would be unfair, inequitable and not morally correct. Just think—Gelder is from Berkeley, too.

Is the spirit of patriotism on the wane? asks a bay city minister. Lincoln day was slightly observed, Washington's birthday may receive a little attention by school children. The movies seem to have captured Patriotism's "goat." Past history is soon forgotten. Everybody is eager for the new, not the old.

Despite the protests of printers from all parts of the country, Uncle Sam continues to print envelopes at "scab rates." Contracts aggregating $8,000,000 were awarded a Columbus, Ohio, printing firm by the government for printing the corner card on stamped envelopes free. While the purchaser of the envelope obviates "licking" the stamp, his pecuniary benefit is not noticeable.

"Constant Reader" sent us the following jitney, but failed to enclose a stamped envelope for its return. We are printing it as a warning to other spring poets:

Miss Bessie Whitney
Got hit by a jitney;
The doctor got there
and fixed up her hair—
And Bess got all right
(in a jiffy.)

THE MAN, WITH THE CAPITAL MAN BEHIND

The man who has his capital invested in Richmond is your friend. His residence cuts no figure he may live in Oshkosh. Your property is advancing in value through the efforts and enterprise of the man with the capital to do things. So don't knock him, because his sleeping place is not in Richmond. His investment and enterprise in building up Richmond is what counts.
